

Schematic Site Development Plan

Depending upon its geometry and what exterior amenities are included, a site ranging from 5.5 to 7.5 acres would be appropriate for the proposed library. The above plan is based on a 7.5 acre site. In addition to the overall size of the site, access to public transportation and bicycle paths should be an important consideration when making a site selection. The parking lot is designed to meet Normal s existing zoning code and does not account for potential reductions based on sustainability goals.
